Professional Summary

Motivated and adaptable Computer Science and Engineering student with strong problem-solving and software development skills, seeking for Software Engineer roles. With a strong interest in automation, cloud technologies, and scalable software systems. Eager to contribute to building, deploying, and maintaining reliable software solutions in a collaborative engineering environment..

Experience

Rooman Technologies **Sept 2024 – Feb 2025**
AI-DevOps Engineer Intern *Karwar / Remote*

- Built and optimized CI/CD pipelines using DevOps tools such as **Jenkins, Docker, and GitHub Actions** to automate application deployment and improve development workflow efficiency.
- Collaborated with development and operations teams to deploy scalable cloud-based applications, manage containerized environments, and implement Infrastructure as Code (IaC) practices using **Kubernetes and Terraform**.

Friends Union for Enterprising Lives (FUEL) **Nov 2023 – Dec 2023**
Core Java Intern *Hubli*

- Developed and maintained object-oriented applications using Java, implementing concepts such as inheritance, polymorphism, exception handling, collections, and multithreading to build efficient and scalable solutions.
- Participated in debugging, testing, and code optimization activities while collaborating with team members using **Git** for version control while maintaining clean, reusable, and well-documented code.

Education

Ramaiah Institute of Technology, Bengaluru **Nov 2025 – May 2027**
M.Tech. in Computer Science and Engineering *CGPA: 7.80/10*

Government Engineering College, Karwar **Dec 2021 – May 2025**
B.E. in Computer Science and Engineering *CGPA: 8.04/10*

MES Chaitanya PU College, Sirsi **June 2019 – July 2021**
PCMCs *94.17%*

Projects

SlideCraft - A Presentation Tool in Kannada Language | *C#, .NET 8, WPF, Open XML SDK, XAML* **Sept 2026**

- Developed a PowerPoint-like desktop application using **C#** and **WPF** with a user-friendly graphical interface. Implemented core features including creating presentations, adding slides, inserting text boxes and images, and exporting presentations to **.pptx** format.
- Integrated the open-source **DocumentFormat.OpenXml SDK** for PowerPoint file generation. Added **English–Kannada** language switching to improve accessibility and usability. Followed a modular design with separate components for UI, presentation management, file handling, and localization.

FlimFlex – A Movie Booking System | *MongoDB, React.js, Express.js, Node.js* **Apr 2025**

- Implemented real-time seat availability and seat locking functionality using **Socket.IO** to prevent double booking and provide live booking updates for multiple users simultaneously.
- Integrated online payment processing with **Razorpay**, developed an admin analytics dashboard, and added automated email/SMS booking confirmations to enhance user experience and system management efficiency.

Skills

Programming: C++, Python, C#
Web Development: React.js, Node.js, Express.js
Software Development: SDLC, REST APIs
Databases: SQL, MongoDB
Cloud & DevOps: Docker, Kubernetes, AWS, Terraform, Jenkins, GitHub Actions, Linux
Tools: Git, GitHub, CUDA, .NET 8, WPF, Open XML SDK, XAML

Certifications

SnowPro Associate: Snowflake Platform **Snowflake** Apr 2026
Develop an AI Solution in Azure from **Microsoft Learn** Apr 2026

Honors & Awards

Awarded a **Letter of Recommendation** from FUEL for outstanding performance during the internship period Dec 2023
Scored 584 out of 625 marks to secure 3rd position in the school in the Class 10 Board Examination Apr 2019

Hobbies

Video Editing, Photography, Poster Designing
Tools: VN Video Editor, Canva
